RELX Group™

➤ پایگاه Clinical Key ، مجموعه ای از محصولات انتشارات **Elsevier** می باشد.

➤ یک موتور جستجوی بالینی و یک پایگاه اطلاعاتی قدرتمند که جامعیت ، مورد اطمینان بودن و سرعت در بازیابی اطلاعات و پاسخگویی از مزایای آن محسوب می شود.

➤ مجموعه ای است از مجلات ، کتاب ، راهنماها ، اطلاعات دارویی ، تصاویر ، ویدیوهای پزشکی و جراحی و شواهد بالینی مورد نیاز پزشکان ، پیرا پزشکان ، دانشجویان و بیماران

- این مجموعه حاوی :
- بیش از ۵۰۰ عنوان مجله پزشکی و جراحی از انتشارات **Elsevier**
- بیش از ۱۱۰۰ عنوان کتب مرجع پزشکی و جراحی
- مجموع کامل ۵۷ عنوان مجله از مجلات **Clinics of north America**
- آموزش بیش از ۳۵۰ تکنیک جراحی و ۴۵۰ عنوان شرح عمل جراحی
- مقالات بالینی و شرح بیماریهای مبتنی بر شواهد بیش از ۷۵۰ بیماری
- دسترسی به بیش از ۱۵۰۰۰ راهنمای آموزش بیمار
- حدود ۱۳۰۰۰ ویدیو پزشکی
- حدود ۵۰۰۰۰۰۰ تصویر پزشکی
- بیش از ۴۰۰۰ راهنمای عملی بالینی
- اطلاعات بیش از ۲۹۰۰ دارو که توسط شرکت **Gold standard** فراهم شده و به روزرسانی می شود.
- ۲۰ میلیون خلاصه مقاله مدلاین که به صورت روزانه از کتابخانه ملی پزشکی به این مجموعه اضافه می گردد.

برای استفاده بهتر از امکانات سایت مانند ذخیره نتایج جستجو و بازیابی آنها در مراجعات بعدی، ثبت نام (Register) کنید. پس از انجام ثبت نام، از گزینه Login برای وارد شدن به سایت استفاده نمایید.

Infections in the Elderly

دسترسی به فولتکست

Kent B. Crossley and Phillip K. Peterson

Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases, 315, 3459-3465.e3

Keywords

bacteremia, decubitus, elderly, enterohemorrhagic *Escherichia coli*, herpes zoster, influenza, pneumonia, tuberculosis, urinary tract infection, West Nile virus

Short View Summary

GENERAL CONSIDERATIONS

- People living past 65 years of age are rapidly increasing in number.
- Individuals older than age 65 years have a higher incidence of most infections than do younger people.
- For nearly all infections, clinical manifestations are more subtle in the elderly.

URINARY TRACT INFECTION

- Asymptomatic bacteriuria should not be treated.
- Symptomatic infection is often caused by organisms other than *Escherichia coli*.
- Extended-duration therapy (i.e., >7 days) of symptomatic infection is not needed in either men or women.

نحوه جستجوی مقاله در سایت کلینیکال کی

- با وارد کردن کلمه geriatric در کادر جستجو و انتخاب Journals ، مقالاتی با موضوع geriatric نمایش داده خواهد شد. فولتکست مقالات با کلیک بر روی آیکن Pdf قابل دانلود است.

برای اخذ کردن مقاله می توان از Filter موجود در بالای مقالات بازیابی شده استفاده کرد:

۱-نوع مقاله را در قسمت Source type مشخص می کنیم:

* مقالات دارای فولتکست (Full text article):این مقالات را می توان در سایت مطالعه کرد یا متن کامل آنرا با کلیک بر روی Pdf دریافت و ذخیره و پرینت کرد.

* مقالات مدلاین (Medline) : این مقالات بصورت چکیده در سایت هستند و برای دریافت متن کامل مقاله ، شما را آخر چکیده مقاله ، در قسمت **NLM citation ID** به آدرس آن در سایت پابمد ارجاع می دهند.

۲-نوع مطالعه را در قسمت Study type مشخص می کنیم:

- * systematic review
- * meta analysis
- * randomized control trials
- * narrative review

۳- مقاله را می توان از نظر موضوعی اخص تر کرد. برای این منظور از Specialties استفاده می کنیم. با باز کردن لینک کشویی مزبور ، موضوعات اخص تر را می توان دید و از آنها برای جستجوی بهتر استفاده کرد.

۴- و در آخر ، مقالات بازیابی شده را در حیطه زمانی مشخص می توان جستجو کرد.

همانطور که قبلا گفته شد برای دریافت فولتکست بر روی PMID مقاله کلیک می کنیم تا به سایت پابمد متصل شده و لینک دسترسی را دریافت کنیم

The screenshot shows a web browser window displaying a ClinicalKey article. The address bar shows the URL: <https://www.clinicalkey.com/#/content/medline/2-s2.0-24036952>. The page title is "Abstract". The abstract text discusses rare missense alleles in genes other than CFI, specifically mentioning C3 and C9, and their association with advanced age-related macular degeneration. The citation information is provided below the abstract, including the journal name "Nature genetics", the volume and issue "45 (11)", and the page numbers "1366-70". The PMID (24036952) is highlighted with an orange box and an orange arrow pointing to it from the left. The PMID is labeled "مقاله PMID" (Article PMID).

Abstract

with rare missense alleles in genes other than CFI. Genotyping in 5,115 independent samples confirmed associations with AMD of an allele in C3 encoding p.Lys155Gln (replication $P = 3.5 \times 10^{-5}$, OR = 2.8; joint $P = 5.2 \times 10^{-9}$, OR = 3.8) and an allele in C9 encoding p.Pro167Ser (replication $P = 2.4 \times 10^{-5}$, OR = 2.2; joint $P = 6.5 \times 10^{-7}$, OR = 2.2). Finally, we show that the allele of C3 encoding Gln155 results in resistance to proteolytic inactivation by CFH and CFI. These results implicate loss of C3 protein regulation and excessive alternative complement activation in AMD pathogenesis, thus informing both the direction of effect and mechanistic underpinnings of this disorder.

Citation

Rare variants in CFI, C3 and C9 are associated with high risk of advanced age-related macular degeneration.

Acetaminophen

⊞ Acephen | Aceta | Actamin | Anacin Aspirin Free | Apra ...

Drug Information Provided By Gold Standard

Description: Acetaminophen (APAP, paracetamol) is a para-aminophenol analgesic and the active metabolite of phenacetin. Due to the toxic effects of phenacetin at therapeutic doses and the availability of acetaminophen, phenacetin is no longer used. Acetaminophen possesses analgesic and antipyretic activity similar to aspirin; however, acetaminophen has no peripheral antiinflammatory activity or effects on platelet function. Acetaminophen was first used in clinical medicine in the 1890's. It is effective in the relief of both acute and chronic pain and may be preferred over NSAIDs due to fewer hematologic, GI, and renal effects. Acetaminophen is the preferred analgesic/antipyretic for patients in whom aspirin is contraindicated and in those with underlying renal disease for episodic, though not chronic, use.²³⁹⁷⁷ In addition, acetaminophen has been recommended by the American Lung Association as the first line treatment for aches and pains associated with the flu, by the American Geriatrics Society for both minor and persistent pain in elderly patients³⁵⁶¹⁴, and by the American College of Rheumatology as first-line therapy for osteoarthritis of the hip or knee³⁵⁶⁷⁶. The drug has a history of safe and effective use; however, unintentional or intentional misuse of acetaminophen is the number one cause of acute hepatic failure in the U.S.³²²⁰² Acetaminophen was first approved by the FDA in 1950. Intravenous acetaminophen (Ofirmev) was approved by the FDA in November 2010 for the treatment of pain and fever in adults, adolescents, and children over the age of 2 years.⁴²²⁸⁹

Mechanism of Action: The exact mechanism of action is unknown, but acetaminophen is thought to mediate its actions centrally through activation of the descending serotonergic pathways. Acetaminophen is believed to increase the pain threshold by inhibiting prostaglandin (PG) synthesis through the cyclooxygenase (COX) pathway, similar to nonsteroidal anti-inflammatory drugs (NSAIDs). Though

چنانچه به دنبال جستجوی دارو برای درمان بیماری خاصی هستیم نیز نام بیماری در کادر جستجو نوشته شده و محتوا بر روی Drug monographs قرار می گیرد. بطور مثال بیماری میگرن در کادر نوشته شده و جستجو می گردد.

Migraine Headache
Disease Overview > View Full Topic
Ferri's Clinical Advisor 2016 - Ferri, Fred F., M.D., F.A.C.P.

Definition
Migraine headaches are recurrent headaches that are either preceded by a focal neurologic symptom (migraine with aura), occur independently without preceding focal neurologic symptoms (migraine without aura), or have atypical presentations (migraine variants). The migraine aura typically is characterized by visual or sensory symptoms that develop over 5 to 60 min. If aura includes motor weakness, the migraine is referred to as hemiplegic. In migraine with and without aura, the headache is typically unilateral, pulsatile, and associated with nausea and vomiting, photophobia, and phonophobia. Migraines that occur ≥15 days every month for ≥3 months are known as chronic; otherwise, they are referred to as episodic.

PATIENT EDUCATION
CARING FOR YOUR CHILD WITH ASTHMA

Copyright © 2011 by Saunders, an imprint of Elsevier, Inc..
Last revised: June 2, 2012.

In asthma, normal airflow in airways (bronchi) is blocked. It most often starts in childhood. Children have small airways, so their asthma is especially serious.

Asthma attacks may be caused by pollen, dust, dander, smoke, cold weather, flu, and stress.

Symptoms include wheezing, coughing, chest tightness, and

Asthma in Children

Disease Overview

> View Full Topic

Conn's Current Therapy 2016 - Bope, Edward T., MD; Kellerman, Rick...

Epidemiology

Asthma prevalence in the United States has been on the rise since the 1990s. It is currently estimated that 9.6% of children younger than 18 years (7.1 million children) carry the diagnosis of asthma. Male sex, African American or Puerto Rican ethnicity, and lower socioeconomic status are associated with an increased risk of developing asthma. Prevalence estimates for these groups are as high as 11% to 16%.

Asthma has a significant impact on both school attendance and health care expenditures. According to the National Health Statistic Report in 2007, children made 640,000 emergency department visits and were hospitalized 157,000 times as a result of asthma. In 2008 it was estimated that there were 10.5 million missed school days, and about 5% of children reported long-term limitations on their usual activities due to asthma symptoms.

اگر خواهان اطلاعاتی در مورد پروسه جراحی باشیم میتوانیم از قسمت procedures
consult استفاده کنیم

به عنوان مثال می خواهیم در مورد جراحی Thyroid gland اطلاعاتی به دست آوریم

The screenshot shows a web browser window with the ClinicalKey website. The search bar at the top contains the text "Thyroid gland". Below the search bar, there are filters for "Procedures" and "Thyroid gland". The results are displayed as a list of procedures, each with a checkbox, the procedure name, and the author's name and publication date. The first three results are highlighted with a light blue background.

Guidelines

راهنماها

برای پیدا کردن راهنماهای بالینی از قسمت Guidelines استفاده می کنیم. به عنوان مثال یک راهنما در مورد نحوه رفتار با بیمار مبتلا به پارکینسون می خواهیم

The screenshot shows the ClinicalKey website interface. The browser address bar displays the URL: https://www.clinicalkey.com/#/content/nice_guidelines/65-s2.0. The ClinicalKey logo is in the top left, and navigation links for English, CME, Login, and Register are in the top right. A search bar contains the text "Parkinson disease", and a "Back to results" link is visible. On the left side, a "Go to:" dropdown menu is set to "Outline", and a list of sections is provided: Introduction, Patient-centred care, Key priorities for implementation, 1 Guidance, 2 Notes on the scope of the guidance, 3 Implementation in the NHS, 4 Research recommendations, 5 Other versions of this guideline, 6 Related NICE guidance, 7 Review date, Appendix A: Grading scheme, Appendix B: The Guideline Development Group, Appendix C: The Guideline Review Panel, and Appendix D: Technical detail on the criteria for audit. The main content area features the title "GUIDELINE Parkinson's disease in over 20s: diagnosis and management (CG35)" with an orange arrow pointing to the word "GUIDELINE". Below the title, it states "National Institute for Health and Care Excellence (NICE)". The "Introduction" section begins with the text: "Parkinson's disease (PD) is a progressive neurodegenerative condition resulting from the death of the dopamine-containing cells of the substantia nigra. There is no consistently reliable test that can distinguish PD from other conditions that have similar clinical presentations. The diagnosis is primarily clinical, based on a history and examination." The "Health and resource implications" section starts with: "PD is a common, chronic, progressive neurological condition, estimated to affect 100–180 people per". A vertical "Help & Feedback" button is located on the right edge of the page.

Clinical trials

کار آزمایی بالینی

کار آزمایشی بالینی یک مطالعه پزشکی به منظور ارزشیابی و مشاهده اثر یک مورد معین در سلامت فرد می باشد. ثبت کارآزمایی بالینی منجر به جلوگیری از انجام مطالعات تکراری می شود. برای جستجوی این موارد از قسمت clinical trials استفاده کرده ، کلمه یا عبارت مورد جستجو را در کادر جستجو درج می کنیم:

Help & Feedback

برای دستیابی به اطلاعات مورد نظر بر روی نتایج بازیابی کلیک می کنیم:

The screenshot shows the ClinicalKey website interface. At the top, there's a search bar with the text "pancreatic cancer" and a search icon. Below the search bar, there are filters for "Source Type" and "Date". The search results are displayed in a list format, with each result starting with a checkbox and the label "CLINICAL TRIAL". The first result is titled "A Phase 1, Open-label, Multicenter, Safety Study of Nivolumab (Bms-936558) in Combination With Nab-paclitaxel Plus or Minus Gemcitabine...". The second result is titled "A Randomized Three-arm Neoadjuvant and Adjuvant Feasibility and Toxicity Study of a GM-CSF Secreting Allogeneic Pancreatic Cancer...". The third result is titled "Ph 2 Trial of G-FLIP (Low Doses Gemcitabine, 5FU, Leucovorin, Irinotecan & Oxaliplatin), Followed by G-FLIP-DM (G-FLIP + Low Doses ...". The fourth result is titled "Phase I Trial of Preoperative Radiotherapy With Concurrent Bevacizumab, Erlotinib and Capecitabine for Locally Advanced Pancreatic...". On the right side of the page, there is a sidebar titled "Pancreatic Cancer" with a "Disease Overview" section and a "Definition" section. The "Definition" section states: "Pancreatic cancer usually refers to ductal adenocarcinomas of the pancreas, because more than 90% of pancreatic tumors arise from the ductal epithelium. Other major tumors of the pancreas include endocrine malignancies (Chapter 195), carcinoid tumors (Chapter 232), lymphomas (Chapter 185), and a variety of rare sarcomas." The "Epidemiology" section states: "Pancreatic ductal adenocarcinoma (PDAC) has one of the highest incidence-to-mortality ratios of any disease. Although it represents the tenth leading cause of cancer in the United States, it is the fourth leading cause of cancer-related deaths, ' because the vast majority of patients will die from their disease. Annually, approximately 40,000 individuals will die in the United States from PDAC or its complications. The

CLINICAL TRIAL

Safety Study of Nivolumab With Nab-Paclitaxel Plus or Minus Gemcitabine in Pancreatic Cancer, Nab-Paclitaxel / Carboplatin in Stage IIIB/IV Non-Small Cell Lung Cancer or Nab-Paclitaxel in Recurrent Metastatic Breast Cancer

First received on December 3, 2014. Last updated on March 30, 2016.

Purpose

The purpose of this study is to assess safety of nab-paclitaxel based chemotherapy regimens administered prior to and/or in combination with nivolumab in Pancreatic Cancer, Non Small Cell Lung Cancer (NSCLC) and Metastatic Breast Cancer (mBC).
